Megatrends in Customer Experience: Near-Term Adjustments and Long-Term Structural Changes

Roundtable Date: January 20, 2021

If there has been a bright spot in the COVID-19 crisis, now entering its second year, it is the role technology has played in serving customers despite extraordinary circumstances. The implementation of key technologies before the pandemic struck has enabled organizations and employees to continue to provide excellent customer support despite the unique challenges.

What started as a scramble to enable business continuity for employees and customers alike has grown into an effort to adapt to the long-term realities that organizations now face.

But what still needs to be done in 2021 to deal with the new normal? What are the long-term ramifications for organizations that want to build on the lessons learned in these difficult times to better serve customers beyond 2021?

Find out what our panel of experts predicts will be the key trends of 2021, and what changes they think will live on after the current crisis subsides.

Customer Journey Analytics to Improve CX at Scale

Roundtable Date: January 27, 2021

Improving the customer journey is one of the most relevant components of the critical overarching goal of enhancing customer experience (CX) at scale. The customer journey affects every customer, after all, and journey improvements power key performance indicators that drive the bottom line. The larger the organization, the more difficult it is to overcome structural, technological, and cultural challenges that impede change and increase risk.

Learn from our panel of experts how customer journey analytics can help your company understand and transform your own journeys, keeping them firmly on target with continuous improvements across customer satisfaction, financial, and strategic metrics.

Supercharging Your Contact Center with Artificial Intelligence
Roundtable Date: **February 10, 2021**

Artificial intelligence (AI) and machine learning technologies are already transforming the contact center rapidly due to their promise of better customer experiences at lower cost. A recent study predicted that the market for contact center AI technology would increase from $800 million in 2019 to $2.8 billion by 2024. These new tools offer organizations a boost in customer retention, loyalty, and, ultimately, revenue and shareholder value.

The benefits of a well-orchestrated contact center AI program also include more effective and satisfied agents, which increases employee retention. New agent time-to-train, job satisfaction, and turnover-rate metrics are substantially improved with better technology tools.

Learn what other companies have done to transform their contact centers with AI, as well as the rewards they’ve reaped from their efforts.

**Top Data Quality Issues for a Data-Driven Decade**

Roundtable Date: **February 24, 2021**

The success of your current and future data-driven customer strategies depends, of course, on high-quality, trusted data. But the ease of collecting massive amounts of data often has the unintended consequence of diluting the overall quality of the information you need to power your strategic investments in analytics, artificial intelligence, and data-driven customer programs.

Fortunately, this fundamental issue is not unique or insurmountable.

Join us on this expert roundtable webcast and learn how to ensure your organization can improve data quality and reap the benefits of your data-driven customer strategies.

**Smart IVRs for Exceptional Service**

Roundtable Date: **March 10, 2021**

Interactive voice response (IVR) solutions have evolved tremendously over the past few years and still manage half of all customer inquiries, especially for complex issues. Fortunately, this
The **Omnichannel** Support Imperative

**Roundtable Date:** March 24, 2021

According to one current survey, two out of three customers use at least three channels, on average, to connect with customer service. That’s one of the more conservative estimates of how customers are inclined to switch channels when contacting a company for support. The critical point here is that customers will use the most convenient communication method available to them at any given moment.

Organizations must respond coherently to channel hopping customers by unifying data across all of their customer support touchpoints so that the information gathered in one channel is seamlessly available in others.

If your company struggles to unify data across channels, learn what our panel of experts recommends to present a clear, consistent omnichannel support strategy.

**Workforce Optimization** for More Productive Agents and More Satisfied Customers

**Roundtable Date:** April 7, 2021

The experience of the past year has highlighted workforce optimization (WFO) as a critical component of managing contact center agents, comprehensively, regardless of location.

WFO solutions encompass many different technologies and applications and enable excellent customer service by supporting agents as front-line brand ambassadors. Call recording, quality
monitoring, workforce management, coaching and e-learning, performance management, and even speech analytics fall under the WFO umbrella. From the call center to the back office, WFO is a crucial component to any customer-focused enterprise.

Join this roundtable webcast and learn how WFO solutions enable contact centers to run efficiently and increase customer satisfaction.

**Voice of the Customer** Strategies & Tactics for Better Customer Insights

**Roundtable Date:** April 21, 2021

Top-performing businesses pay close attention to how their customers feel about their experiences with a product or service, and voice-of-the-customer (VoC) programs deliver those crucial insights.

Getting to the heart of what a customer is thinking, feeling, and intending to do in the future is a difficult task, but gleaning actionable insights is crucial for companies to stay on track.

Join our panel of industry experts and learn how your organization can gather useful feedback from customers to keep your brand or offerings in line with your customers’ needs and desires.

**Virtual Contact Centers:** Lessons learned in uncertain times

**Roundtable Date:** May 5, 2021

There are plenty of practical benefits gained by implementing a virtual contact center in your organization, ones that have nothing to do with preparing for a worst-case scenario—which we’ve all collectively experienced in the past year. But one benefit that very early on made itself a necessity is the ability to conduct business seamlessly even in the face of calamity.

Fortunately, virtual contact centers offer all the customer-facing components businesses need to serve customers, including voice, email, chat, messaging, and self-service tools to answer questions quickly and deliver on key performance indicators. They also can support a far-flung workforce with workforce optimization, coaching, and other employee-focused engagement
tools to help develop agent skills and improve retention. Plus, they enable business continuity by virtue of their very architecture.

Join us on this educational roundtable webcast and find out how your organization can benefit by moving your contact center into the cloud.

**Smart Field Service Management Strategies for 2021**

Roundtable Date: **May 19, 2021**

The field service market is estimated to hit $1.6 billion in 2020. Sending technicians into the field is an expensive proposition; field service reps have to be well trained, have good customer service skills, and have the technology and tools to keep them on track and on time.

Customers need to be able to schedule appointments online, at a convenient time for them, and be kept in the loop when bad weather, traffic, or other realities prevent the technician from arriving on time.

Fortunately, many solutions and best practices can systematically improve the odds that field service calls will be punctual, technicians will be well equipped with spare parts and the necessary skills, and customers will be satisfied.

Join our panel of experts on this roundtable webcast and find out how to build a world-class field service organization.

**Speech Analytics & AI: A Game-Changer for CX**

Roundtable Date: **June 1, 2021**

The combination of speech analytics and artificial intelligence (AI) is a powerful tool for understanding what customers are communicating and how to address their intent, even in real time. That’s a game changer. Natural language processing and understanding technologies can
be extended one step further to include quality management and agent coaching, even while the customer is still on the phone.

Self-reported surveys certainly provide useful information, but speech analytics and AI can provide a much more accurate picture of what customers are communicating because the technologies are working with all the information, not just a sample of the whole.

Join our panel of experts on this roundtable webcast and learn what can be accomplished when speech analytics and AI are the drivers of customer experience.

Analytics and Business Intelligence Solutions for Challenging Times

Roundtable Date: June 16, 2021

2021 will be a year of rapid change, a departure from the pre-pandemic world, and the establishment of a “new normal” way of doing business. Many industries will scramble to survive, and others will benefit from the sudden shift in the economy and consumer demand, but the economy will not return to business as usual.

Business intelligence (BI) solutions collect and analyze current, actionable data to provide insights into improving business operations. Business analytics (BA) tools also analyze historical data and predict business trends, which can help you stay prepared even in times of great uncertainty.

Join our experts on this roundtable webcast and learn how BA and BI can help you make intelligent, data-driven decisions that will keep your organization ready for the next new normal stage in the post-pandemic economy.

Transformational CX – Designing experiences that wow customers

Roundtable Date: July 14, 2021

It seems that every survey of business leaders cites customer experience (CX) as a crucial stated goal for their organization. But how does a company deliver CX that differentiates them from their competitors? What priorities should they focus on first? How do they truly transform their CX efforts in a way that customers notice, and that leads to the business outcomes executives expect?

The first step is to reimagine the CX process with the customer as the central constituent. This takes executive buy-in and a long-range vision that affects every aspect of the core business strategies and processes. Many newer business models have leap-frogged into the future because they were unencumbered by legacy systems and ways of doing business. They proved new strategies and models could produce extreme success.

Join our panel of customer experience experts and find out how you can help transform your organization’s CX efforts in a way that wows customers and delivers tangible results.

Master Data Management – A single view of the truth

Roundtable Date: July 28, 2021

Data collection is probably the most straightforward aspect of a data-driven business strategy, but combining many databases into an up-to-date, single view of your customers is a challenging undertaking.

Master data management (MDM) links all the critical business data of an enterprise to a single reference point. It reduces errors and helps pave the way for artificial intelligence and other technologies expected to dominate business applications in the 2020s.

Join this educational roundtable webcast and learn from our panel of experts how to create a master data management system, best practices, and the benefits that will accrue in the decade to come.

I Prefer Self-Service – Don’t make me talk to a CSR

Roundtable Date: August 11, 2021

Does your company inadvertently add to their operational costs by encouraging customers to call your contact center? Let’s face it, with 75 percent of customers preferring to give self-service a try rather than talk to a customer service representative, you’re at odds with delivering what customers desire while increasing your own costs. That’s a lose-lose strategy.

The landscape of solutions offering increasingly savvy self-service, via the web, mobile apps, and voice, has changed dramatically in the past few years. But delivering poor self-service that nudges customers willing to try serving themselves to the phone channel is a failure from both perspectives.

Join our panel of experts and learn what you can do to satisfy your customers by catering to their preferences—and save yourself some money in the process.

November/December Best Practices Issue
Customer Experience Management for Driving B2C Growth

Roundtable Date: August 25, 2021

Customer experience management (CEM) platforms will be a crucial growth driver of the business-to-consumer (B2C) sector in the next decade. The market for CEM solutions is estimated to grow 18 percent annually through 2027, with eventual sales hitting $27 billion. This market is hot right now for a reason.

Large consumer B2C companies need data-centric, artificial intelligence-enhanced solutions to drive efficiencies for, and interactions with, their customers.

If your company is considering a CEM strategy to propel future growth, plan on attending this roundtable webcast. Our panel of experts will outline the benefits of CEM and the results achieved with well-planned implementations.

Designing a Customer Engagement Center

Roundtable Date: September 1, 2021

The evolution from call center to contact center to customer engagement center (CEC) reflects an evolving vision for an organization’s central customer-facing entity, a vision that centers on delivering consistent, high-quality customer experiences (CX).

A well-designed CEC will provide highly personalized customer communications from every current and future channel for interacting with customers. It emphasizes a single view of the customer, which includes their previous history, intent, sentiments, and even proactively anticipating their needs. The improvements in CX will drive all of the positive drivers' organizations' desires and improve operational efficiencies for the customer service organization that CEOs love.

Join our expert panel and find out how to design a customer engagement center to maximize business outcomes and intelligently leverage the new crop of AI-assisted solutions, which will only increase in the next decade.

Creating a **Customer-First** Organization: Technology & People

Roundtable Date: **September 15, 2021**

What does creating a customer-first organization really mean? Fundamentally, it means viewing all aspects of the sales journey first from your customers’ perspective, and then from your company’s.

It could take the form of a liberal return policy with free shipping from an online shoe store, which helps customers overcome their reluctance to buy shoes online. That willingness to put customers first can increase sales and profits significantly beyond the cost of shifting risk from customers to the company. Does incurring extra costs make good business sense? Ask Zappos.

A well-implemented customer-first strategy will keep your customers happy and have a positive long-term impact on your profits.

Join our panel of experts and find out how your company can benefit from putting customers at the center of all your decision making.

The State of **Knowledge Management** in an **AI World**

Roundtable Date: **September 29, 2021**

Traditional knowledge management (KM) focuses on creating content, storing it, indexing it, and retrieving it to answer relevant questions. Subject matter experts create and curate content and revise it when necessary. Artificial intelligence (AI) and related technologies promise to automate this process and deliver a perfect answer to specific questions.

Join our panel of experts and find out if AI can leverage previous investments in KM and how your organization should make the transition from traditional KM to the next incarnation that harnesses the power of AI.

Conversational AI: The Future of Customer Service?

Roundtable Date: October 13, 2021

There is no doubt that conversational artificial intelligence (AI) has the potential to deliver far more personalized customer service at lower cost by combining historical data and natural language processing that continuously learns from interactions. The impact on customer loyalty and retention is enormous.

Conversational AI can not only identify and resolve service issues quickly and efficiently but also track customer actions and glean sentiment data to identify customers who are at high risk of leaving. This allows organizations to optimize next-best-action strategies and personalize the end-to-end customer experience.

Join our panel of experts and find out what is possible with conversational AI today and how this technology will be used to transform customer service.
